Work Experience

Quality Distribution Inc. - Tampa, FL

Software Developer | February 2019 to Present

- My main focus is the analysis, design, and development of new web applications to help make internal company processes more efficient
- Primarily develop new ASP.NET Core MVC applications and REST APIs using C#, JavaScript, SQL, HTML, CSS, and BootStrap
- Maintain legacy applications when necessary

BST GLOBAL - Tampa, FL

Software Engineer | May 2018 to February 2019

- Mainly worked with WPF applications written in C# with a SQL Server database
- My responsibilities included writing estimates, designing solutions, and development of the new solutions
- I also worked on some of the backend solutions in C#

PTS Solutions - Baton Rouge, LA

Senior Development Engineer | January 2018 to April 2018

Development Engineer II | January 2017 to December 2017

Developer | January 2016 to December 2016

Development Intern | June 2015 to December 2015

- Started at PTS Solutions as an intern while I finished my senior year of college at Louisiana State University in May of 2015
- Worked my way up to Senior Development Engineer before I left in April of 2018
- Main goal was to rewrite a suite of applications that were used by law enforcement and emergency services.
- Primary tech stack was WPF, C#, and SQL Server. I started small as an intern by helping with bug fixes and small features
- Gradually earned more responsibility designing new features from scratch and ultimately was made the lead developer on the Jail Management System rewrite
